Mr. Rajeev Phadte demonstrated the importance of NLP for people in personal, professional and social life and the way goals can be achieved.

Mr. Suren Kolkankar also explained the negative emotions and limiting behaviours which tends to be stronger than the logical conscious mind and as habits / patterns are generated and stored by the unconscious mind, the change needs to occur at the unconscious level. Unwanted behaviours and beliefs have been learned and stored at an unconscious level, and these may no longer serve you. It becomes an automatic unconscious response are unable to change consciously, this is the same for phobias and fears and they can only be changed at the unconscious level, and this made the NLP famous for fast phobia cure. The reply of the questions raised by the participants were given by Mr. Suren Kolkankar & Mr. Rajeev Phadte.
